

LABRC National Land Registry Workshop 1- Future State Products & Services

June 16, 2021

Land Title and Survey Authority of British Columbia

John Hay – Senior Program Director

John Hay has been the senior program director at the LTSA since 2008. During that time, he has been responsible for the definition and program leadership of the building of the LTSA's major operational services and system.

He has led the LTSA's business transformation initiative which built ASTRA, the LTSA's back-office registration system. ASTRA includes the world's first automated Land Titles registration capability which currently automatically examines and registers around 58% of Land Title applications.

John also led the initiative to move the LTSA's customer portal myLTSA in-house which included transitioning about 30,000 users. Following that, he led the program to create British Columbia's cadastral map called ParcelMap BC. More recently he has been leading the definition of new initiatives including the Condo Strata Assignment Integrity Register and modernization of the LTSA's survey plan services. John is based in Vancouver and is a Charter Engineer holding an Engineering degree from University of Exeter.

Brian Greening – Director, ParcelMap BC Products

Brian Greening is the LTSA's portfolio lead responsible for ParcelMap BC and related geospatial products. After leading the build and operationalization of ParcelMap BC, he is now focused on driving operational excellence and leading customer-centric development in the portfolio across land-related sectors. His experience spans nearly 25 years within the geospatial industry, including GIS and survey technologies and encompassing technical, consulting and business roles spanning both user and vendor spaces. Brian is based in Vancouver, BC and holds an Engineering degree from the University of New Brunswick.

MDA

Glenn Pope – Principal Engineer in the Land Administration Group

Glenn Pope is a Principal Engineer in the Land Administration Group with MDA with extensive experience in land registry and spatial solutions in land administration. Glenn was the Solution Architect for LTSA's ASTRA back office system leading the overall design and business-rules-based solution for automated registration of LTSA's land title applications (the first in Canada). He also led LTSA's solutioning for:

- Land Ownership Transparency Registry (LOTR)
- Condo and Strata Assignment Integrity Register (CSAIR)
- Survey Plan Services Modernization
- Web Filing

- Online Services Advancement

Glenn has worked in other jurisdictions in the land administration domain: New Zealand, UK, Southeast Asia, Caribbean and other provinces across Canada. He has over 35 years experience that includes working in others domains such as aviation, previously in roles of systems engineer and software engineer developing a range of spatial/temporal information systems. He currently serves as the engineering discipline lead for Solution Engineering at MDA. Glenn is based in Delta, BC and has undergraduate and graduate degrees in Computer Science from the University of British Columbia.

Jun Yang – Principal Engineer in GeoIntelligence and Land Administration Groups

Jun Yang is a Principal Engineer in the GeoIntelligence and Land Administration Groups at MDA with extensive experience in geospatial solutions, including survey and cadastre management for land administration. Jun was the Solution Architect for LTSA’s ParcelMap BC program, including both system build and data build.

Jun has worked in other jurisdictions in the survey and cadastral land administration domain: New Zealand, UK, Southeast Asia, Caribbean and other provinces across Canada. In her 28 years working at MDA, she has also worked on many Geospatial/GeoIntelligence programs for government agencies, such as the Department of National Defence (DND) and Canadian Space Agency (CSA).

Deloitte

Julia Woolsey – Senior Consultant

Julia Woolsey is a Senior Consultant in Deloitte’s Operations Transformation Consulting practice in Ottawa. Passionate about helping the public sector better serve citizens and stakeholders, Julia has experience working in a variety of areas including process evaluation and improvement, operating model design, robotic process automation, strategy and program management.

Stewart Young – Senior Manager

Stewart is a Senior Manager in Deloitte’s Strategy and Operations Consulting practice based in Victoria BC, with a focus on public sector. After joining Deloitte in August 2014, his consulting work across various public sector agencies has included project and program management, large-scale business transformation, program evaluation, workshop planning and facilitation, stakeholder engagement (including surveys, interviews and executive roundtables) and financial modelling.

Angie Derrickson – Manager: Training, Mentorship & Professional Development

Angie Derrickson is a proud member of Westbank First Nation, which is located in south central British Columbia, Canada. Her career started at Westbank, with roles in Administration, Intergovernmental Affairs, and Senior Lands Officer from 2000 to 2010, while completing her Professional Lands Management Certification at the University of Saskatchewan in 2009. She later contributed to the development and delivery of Parts 1, 2, 3 of the BCAFN Governance Toolkit. In June 2013, Angie was delighted to join the RC team and has since completed JIBC Associate Certificate in Training & Facilitation and continues to support strategic approaches for Training, Mentorship and Professional Development for Land Management across Canada.
