

1. Identify some of the challenges that your community faces in solid waste.
2. Where is your community in terms of solid waste management planning.
 - No plan, has a plan but needs to be update, missing key elements from existing plan, etc.
3. What are some of the goals you would like to see set for your community in solid waste management? Examples:
 - Wastes will be sorted, processed, and stored temporarily on-site for reuse, recycling, composting or treatment
 - Improving segregation and signage
 - Depolluting wastes that contain hazardous substances
 - Re-using materials on-site or within the community
 - The quantity of waste requiring disposal will be greatly reduced over time and any residual on-site will be done in an environmentally-sound manner
 - Community members and the private sector will be actively engaged in sustainable waste diversion activities
