1.1 Introductions (2/2)

What interested you in this session? (1/5)

- Talking about LUP and networking with other FNs
- LUP
- We are on the process of land use planning.
- Learning and here other First Nations LUP and experience
- Land use planning
- Meeting other First Nations
- We are currently working on amending our LUP for Shxw'ōwhámél. And being fresh back into the land's department I am excited to start on this with the community
- Implementing Land Use planning
- regional land use planning, conflicting values
- Re-energize by reconnecting and getting up to date on LUP!!
- Implementing a Land Use Plan Economic development Land Protection
- Learning from other nations
- Different approaches to Land Use Planning.

067

1.1 Introductions (2/2)

What interested you in this session? (2/5)

- Land Zoning
- Implementation
- Learning tips on LUP initiatives
- We have initiated a LUP process for our community. We are currently conducting the phase 1 - prep work for the LUP. Identifying the vision, mission, values, and high level priorities.
- The FNLM process and successes, also always enjoy the networking opportunities
- Networking and learning more about land management.
- Learning from other First Nation how they navigate through landuse planning.
- To learn from other Nations about how to make a better land use plan.
- We are updating our Land Use plan this year - came to learn from other nations
- Land code development
- We will be developing a LUP
- Consultant Experiences. Length and Timelines. Community Engagement. Laws

067

1.1 Introductions (2/2)

What interested you in this session? (3/5)

- Find out how to finalize an LUP
 - Meeting people from other communities
 - Networking and information
 - More knowledge to help in my job responsibilities
 - As Direcyor of Operations I want to be making informed decisions for my community and I feel attending these workshops help me to do that better.
 - Land us planning and networking
 - Although I have a lot of experience, I am
- a new to my position as Land Manager.
 - Land Use Planning
 - Tools for Implementation
 - Learning from others
 - Meeting all the other people and catching up to the latest news
 - learning the basics
 - Land Use Planning! I have an appraisal background working with land use, so I really enjoy working with the planning process.
 - Land Use Planning

1.1 Introductions (2/2)

067

What interested you in this session? (4/5)

- Learning more on the lup
- We are starting our environmental plan
- Listening and learning about land use planning and issues
- Love of planning
- COTTFN is in the beginning steps of looking to create a Land Use Plan and to plan for the future for land development, and land conservation
- Everything
- Understanding more about the connection between land use planning and other land management tools
- Doing some community master planning, wanted to learn from others
- We are going to be updating our LUP i wasnt here first time round so would like to learn more about the process
- Our community is currently working on our Land Use Plan and trying to make sure it is efficient and easy to understand.
- Networking

067

1.1 Introductions (2/2)

What interested you in this session? (5/5)

- I lead/support planning initiatives for Fort McKay as part of my job.
- Shared knowledge, networking
- Currently in the land use planning process.
- Land Use Planning
- Environment and Land Use Planning
- We are working on our Land Use Plan.
- Implementation of the Land Use Plan
- Both Land Use Planning and Regional Networking
- Learning from other communities and being inspired!
- Land Use Planning
- I'm a newbie so all of it! 😁
- Land use plan
- Implement the LUP
- Networking
- The whole process during in school for land management
- Land use planning
- Innovation and environment

(1.3) 1. Does your First Nation have a Land Use Plan?

078

Yes

No

Not Sure

Where are you in your land use planning process?

(1/4)

- Reviewing old templates document
- Didn't start yet
- First Draft being completed after slow engagement over COVID-19
- Ready to implement
- Have old draft plans that were never approved/ratified. Competing a business feasibility/land use plan for commercial areas and a housing development land suitability plan.
- Draft LUP
- LUP draft/engagement
- Almost at ratification stage
- We have an LUP for one reserve, but not the other. Due to staffing shortages, no implementation has been done on the one that exists (and was developed three years ago).
- Draft finalized just require voting process
- Developed inn2012. Needs updating now that we are operational
- Currently developing LUP
- Pre-Kindergarten
- Pre-planning work on vision. Mission, values, and high level priorities.

Where are you in your land use planning process?

(2/4)

- Preparing for a community engagement session on these items.
- Was not approved by community
- Pre qualify for fnlm having elected leadership understand the process is the challenge
- We have a comprehensive community plan but nothing else. We are in the stage of identifying what we need and finding the capacity to put something together.
- We are at a stand still with our LUP until our legacy issues are resolved.
- Land Use Plan we are updating ours
 - Membertou First Nation
- LUP is +5yrs old
- Engagement planning on updating LUP
- Draft that requires Community Engagement.
- draft plan needs community engagement, but we have no LUP implementation plan
- Updating LUP, building permitting
- Community engagement
- LUP is in draft.
- Land use planning has been done in 2015. Updating now

068

Where are you in your land use planning process? (3/4)

- Ratification
- Update
- Community Engagement
- Learning LUP
- Ratified
- Currently in development - community engagement
- We are currently in the amendment process
- Completed
- Development stage
- LUP is in draft; ready to go to vote.
- Draft plan!
- Implementation and updating
- In developmental stage
- Development
- In development of a LUP
- Engagement
- learning about LUP
- Updating
- Seeking out consultant, Developing RFP, scope of work
- Completed
- Implementation
- Learning about LUP
- Final stages before ratification
- Concept drawings
- Milestone 4 under Development of LUP

068

Where are you in your land use planning process?

(4/4)

- We are currently revising our land use plan, and starting to plan engagement
- Have yet to start and apply for funding
- Lost 😊 J.k
- Implementation
- Drafting
- In development stage
- I don't know!
- Pre planning. Seeking Consultants. Building RFP
- In draft
- LUP development workplan
- Complete, pending member ratification
- Learning about LUP
- Implementation and definition of processes
- Draft LUP
- In development stage
- Implementation
- Completed

062

(1.3) 2. Which department(s) have been involved in the development of your Land Use Plan?

(1/5)

- Lands, intergovernmental affairs, housing, public work, environmental stewardship, legal, lands committee
- KS Kayla Seipp 1 minute ago
Community lands and part of member services
- Admin., housing, infrastructure, ec drv., finance, legal, youth, elder, and emergency management, so far
- Membertou Geomatics, Lands, Public Works, Governance, Enforcement Oversight Committee
- One woman team Crystal who is now on the LAC
- Elders and Youth
- Admin Housing Infrastructure Legal Ec. Dev Finance Community youth and elder EMO
- All departments (ideally)
- Housing, roads dept, public works, forestry dept, ec dev, c&c
- Once started, I would like to engage consultation department, economic development department, some youth and elders as well for sure
- Housing, Public Works,

(1.3) 2. Which department(s) have been involved in the development of your Land Use Plan? (2/5)

062

- Lands, Health,
- Lands, Lands committee, housing, staff, , band, Ec dev, admin and consultant & most important our resource manager, culture
- Public works, forestry, consultation, ec dev, finance, leadership and committees
- Lands Economic Development
Housing Governance Public works
Fisheries Health
- Lands manager
- Housing, Fred and public works
- Housing, public works, ec dev, council,. But there a lot of silos to overcome
- All departments- social, lands, economic, public works etc.
- All
- Lands, Environment, Public works, Housing, Ec Dev, Health, Justice, and C&C
- Leadership, Housing, Capital Public Works, SDC, SSIG and Rights and Title
- Public Works & Housing, Lands & Resources, Ec Dev, Lands Committee, Community input

062

(1.3) 2. Which department(s) have been involved in the development of your Land Use Plan? (3/5)

- Lands, Economic Development, Public Works, Cultural Heritage
- Housing Health Land Manager Elders School Community Ec Dev
- O&M, Health, finance, housing, education All departments...
- All departments
- All
- Capital, public works, housing
- Lands. Ec dev. Health. Council. Infrastructure
- Lands Administration Economic Development
- Housing department
- Lands, housing and capital, education, ec dev
- Lands and Resources Department leading, have engaged Resettlement Committee
- We only have one dept, we are the lands office as a whole
- Public works and Lands dept
- Public works Housing Transportation Lands
- All departments
- Lands, Housing, and economic development, administration, finance
- All departments and membership

062

(1.3) 2. Which department(s) have been involved in the development of your Land Use Plan? (4/5)

- Lands, governance, public works, admin, Natural Resources, Ec Dev
- Economic development
- Lands
- Lands PW Governance Housing Administrative Geomatics
- Housing, capital, o&M leadership ec dev
- Lands, Ec Dev, Housing, Public Works
- Lands, health, housing, justice for enforcement
- Land code committee
- all
- Most departments...its a collective process
- TREP, treaty rights and environmental protection Housing Asset management
- Public works, housing, treaties, lands and environment, economic development
- Lands, housing, elders, school
- All Departments
- Housing Community Infrastructure
- Community development Economic development
- All - some more than others, but

062

(1.3) 2. Which department(s) have been involved in the development of your Land Use Plan? (5/5)

- all departments will have an interest.
- Chief and Council, Lands, Public Works and any Advisory Committee
- Ec dev
- We will be incorporating other depts as we move thru the process
- Education, lands and resources, economic development, health and social
- Lands Housing Special Projects/initiatives
- None
- Haven't started yet
- ALL
- Lands and economic development
- All

(1.3) 4. Did you use an existing LUP (draft or old plan) when you started your LUP development process?

053

Yes

No

Not sure

0 5 4

(1.3) 5. Does community engagement look different at different stages of the LUP development process (early versus later stages)?

Yes

No

Not sure

(1.3) 3. What existing documents did you use to build your LUP? (e.g. housing plan, resource management plan, community safety guidance or community quality guidance)

(1/3)

- Comprehensive community development plan, draft EMP
- Strategic plan
- Ccp community development plan housing and health plan
- Before my time, but I understand the EMP, CCP, Housing and Ec Dev plans
- EMP STARTED, ccp, strategic plan
- In progress stage but we have the comprehensive plan to use
- Land Code
- CCP, Bio Regional Atlas, TUS
- constitution and Citizenship Code
- CCP, environmental,
- Other nation LUP
- Capital plans, CCP
- Ccp
- CCP Development law Community protection law Development plans Building permit process
- Old LUP plans as reference and updating it
- Started from scratch
- CCP plan, strat plan,

(1.3) 3. What existing documents did you use to build your LUP? (e.g. housing plan, resource management plan, community safety guidance or community quality guidance)

(2/3)

- land code, land use studies and interviews, interactive map,
- Not sure i was not involved
- CCP, Enviro reports, strategic plans, EOC plans,
- Zoning Law, housing plan, CCP
- CCP
- Ccp, infrastructure, housing capital, public works
- Past LUPs and planning docs, incl arch plans
- We will use the CCP, LC, COMMUNITY EMERGENCY PLAN
- CCP but it's dated (2016) before reserve was awarded in 2018
- Previous plan CCP Land Code Strategic plan
- CCP, Capitol plan
- ESA
- Older LUP, CCP
- Traditional land use study
- Draft forestry plan, draft swmp
- Comprehensive community plan
- CCP, housing policy, emergency management plan
- CCP, environmental plan

037

(1.3) 3. What existing documents did you use to build your LUP? (e.g. housing plan, resource management plan, community safety guidance or community quality guidance)

(3/3)

- Old draft LUPs that didn't get approved
- Wildlife studies or environmental monitoring
- CCP, housing, capital
- CCP
- Comprehensive Community Plan, Strategic Plan
- CCP

002

(1.3) Does community engagement look different at different stages of the LUP development process (early versus later stages)?

- Yes, you need to see where you started and how the process changes as you go to make informed decisions moving forward with community.
- Great discussion, please continue to share your thoughts.

1.4a LUP Innovation - Community Decision-Making Processes (1/3)

002

How do traditional land use practices, cultural values, and teachings influence modern-day land use planning and contribute to the preservation of cultural heritage within First Nation lands?

- Not at this time.
- Consistently gathering traditional use in your territory for cultural use, spiritual use and harvesting and taking all into account into your LUP will help preserve for future continued use will help protect and identify your sensitive areas Need to incorporate old uses and future uses. Always think of seven generations ahead, our unborn that's gonna inherit our territories.

1.4a LUP Innovation - Community Decision-Making Processes (2/3)

002

How are community members actively involved in the planning process, are there any examples of unique or new engagement approaches you have used?

- Open house approach with consultants doing the LUP, lands office, LABRC, 20 year housing assessment project, kids area to draw things they want in the community and conducting surveys for LUP and housing assessment projects.
- Keep it interesting and Interactive, one way

is to introduce colour coding stickers on a big map on where they see would be good for certain items and if its condense with the most stickers where things should go, then thats where we try to make it happen. Just example for community engagement.

1.4a LUP Innovation - Community Decision-Making Processes (3/3)

002

Can you share examples of successful collaborations or partnerships between First Nations and external stakeholders in land use planning initiatives?

- Not at this time. But a formal table or committee established with TOR to address LUP activities and development.
- Not at this time, but still looking forward to the opportunity.

1.4b LUP Innovation - Jurisdictional Authority (1/4)

003

What opportunities exist for First Nations to lead and influence regional land use planning decisions that affect First Nation lands?

- Non at this time
- We have created MOUs with some local governments and the province and are in the process of creating more so that we are also at the table
- If the nations are willing to talk, then a modern day treaty between both nations can be made on overlapping territories and some sort of common agreement and a working matrix can be made to co-manage overlapping areas.

002

1.4b LUP Innovation - Jurisdictional Authority (2/4)

How do First Nations collaborate with neighboring jurisdictions in regional land use planning initiatives, and what are the benefits and challenges of such partnerships?

- No info at this time.
- Challenges are we are almost an after thought and not advised of projects until the last moment and then we are perceived as the hold up as we put the breaks on things until we can review and respond accordingly

1.4b LUP Innovation - Jurisdictional Authority (3/4)

002

What role do Federal, Provincial, Local Government and First Nation agreements play in facilitating cooperation and coordination between your First Nation and other jurisdictions in regional land use planning?

- Would be the tribal councils that work on this
- There is a requirement that the Nation's are consulted on OCP creation and amendments but otherwise it comes down to relationship building

002

1.4b LUP Innovation - Jurisdictional Authority (4/4)

How do First Nations ensure their governance authority and self-determination are respected and upheld in 'collaborative' planning processes?

- No info at this time
- Go public. Go to the media if your Nation is being ignored. We also wrote into our MOUs that when we respond to consultation that we reserve the right to ask how our comments were considered. That leads to some accountability.

1.4c LUP Innovation - Technology Integration (1/4)

How can emerging technologies, such as GIS mapping and remote sensing, enhance traditional planning practices on First Nation lands?

- With providing specific and visual data to help manage areas.

1.4c LUP Innovation - Technology Integration (2/4)

001

What are some successful examples of utilizing technology to facilitate community engagement and decision-making processes in land use planning?

- Drone use, most times maps and areas change and to help getting right now pictures that can be geo referenced.

1.4c LUP Innovation - Technology Integration (3/4)

001

In what ways can Indigenous knowledge systems be integrated with modern technological tools to create more holistic and culturally appropriate land use plans?

- By combining maps, images and traditional knowledge then you can have more of an informed view to make better decisions.

1.4c LUP Innovation - Technology Integration (4/4)

What are the key considerations and potential challenges associated with incorporating technology into planning efforts, and how can these be addressed?

- Someone uses it against you or for their own gain.

1.4d LUP Innovation - Climate Resilience & Adaptive Planning (1/5)

002

How does climate change impact your First Nation? Have traditional land practices been affected, have you been able to use land use planning processes to address these challenges?
(1/2)

- Yes, fire hazard due to drought. One of the FN initiatives is to make a fire guard all around our reserve for cat guard quick response. Harvesting areas are affected but thinking of the community trumps concern. So harvesting what we can is part of the things to do before area is opened up. Log will be used for winter fire logs for homes and cabins for elders, trappers and cultural sites.
- We are undertaking flood and fire risk mapping project to inform land use planning on reserve. We are concerned about the risk

1.4d LUP Innovation - Climate Resilience & Adaptive Planning (1/5)

002

How does climate change impact your First Nation? Have traditional land practices been affected, have you been able to use land use planning processes to address these challenges?
(2/2)

of fire and have formed and been training an emergency task team. We also hope to conduct fire smart activities (brush cutting) of perimeter of reserve. We are working at our grading a road so that we have more than one way in and out of reserve. Traditional

practices have recently been affected by low water levels- eg access to fishing and hunting sites

1.4d LUP Innovation - Climate Resilience & Adaptive Planning (2/5)

002

Can you share examples of innovative strategies used by First Nations to integrate climate resilience and adaptive planning into proposed development projects or planning documents?

- Food security, gardens, buffalo heard and water research on and off reserve.
- We are finalizing a flood and fire risk research and analysis project (with FN Adapt funding) that combines member interview accounts of traditional

use and experience on the land with that of engineering surveys. This information is to be compiled to develop our climate adaptation strategy.

1.4d LUP Innovation - Climate Resilience & Adaptive Planning (3/5)

002

How do First Nations navigate balancing economic development with climate resilience goals? Is your LUP an effective tool to regulate development through a climate change lens? If not, what has been the most effective tool?

- Our LUP is as we learn and go, still in development but trying to consider all options and concerns is key.
- We don't have an LUP yet, but when we conduct our outreach and research to develop this plan this year, we plan to have the flood/fire risk data inform our land use plan. Hopefully we can zone for ecdev in areas that won't interfere with climate adaptation plans

1.4d LUP Innovation - Climate Resilience & Adaptive Planning (4/5)

002

What role does traditional ecological knowledge play in developing climate-resilient land use plans?

- Identify and cataloging plants for harvesting for all types of needs is key, also learning the the eco sites there in and also looking at morphology for all those plants on seeking where else the probability they may be can help if ground truthed.
- TEK accounts are informing understanding of historic flood and fire occurrences and to understand how our ancestors dealt with these crises and/or prevented them

1.4d LUP Innovation - Climate Resilience & Adaptive Planning (5/5)

002

How can partnerships between First Nations, governments, and other stakeholders enhance climate resilience efforts in land use planning?

- Meaningful and transparent efforts in keeping each other safe.
- Partnerships can provide greater regional resilience in that Adjacent First Nations and municipalities can develop a cooperative response through joint planning and sharing of emergency management plans. Adaptation plans can also be shared and integrated.

0 4 1

(2.2) 1. What could LUP Implementation look like for your First Nation?

(1/5)

- A land governance document to guide the implementation process involving the whole community including leadership and administration.
- Communication and direction for the First Nation
- Community learning to follow the LUP. How are other nations doing with there LUP?
- Full of challenges but will be worth while
- vision of tomorrow
- This brings the communities thoughts and interests to protect the land for future generations to come.
- Conversations with members to seek their input
- It would definitely look amazing, we need to get our LUP going asap, this would help with ensuring we have better control over our assets and the locations that best fit them
- Keep community involved
- Working with our economic development department. Also, having our community members voices and concerns heard.

0 4 1

(2.2) 1. What could LUP Implementation look like for your First Nation? (2/5)

- Infrastructure development- construction, mobilization of resettlement
- A blueprint for sustainability utilizing traditions and processes set by our people for our people.
- Engage council and senior staff. As well as business arm. Roll out to all staff and community. Develop tools
- Engaging the community. Work plan for all
- Enforcement Creating a Land Use Law Concept Plan Traffic
- Impacts analysis on developments
- Capacity development And more...
- Using proper land designation and resources and land base learning
- Protection of green spaces/sensitive habitats. Riparian zones Zoning
- A living document that is referenced day to day rather than collecting dust
- Community trust in decisions and support for projects
- Zoning, laws, community

0 4 1

(2.2) 1. What could LUP Implementation look like for your First Nation?

(3/5)

- engagement process
- First, you have to have a community ceremony with the drum to kick off the implementation. This is to ensure that we involve our ancestors and that it is successful in the future.
- Structured and organized Lands management for all IR lands
- enforcement, environmental monitoring against clear thresholds, response plan if monitoring exceeds thresholds, regular reporting and updates
- Laws and policies and procedures
- River rise impact and stabilization study
- Keeping community engaged
- Everyone learning a new system together.
- Fine tune our zoning based on new capital projects
- Work plan within the department - org chart within the department , roles and responsibilities defined Committee formed, communication process between c&c and community defined,
- Implementation of a Development Application Process

(2.2) 1. What could LUP Implementation look like for your First Nation?

(4/5)

- for any type of Development
- Buy in from leadership to staff and right to membership
- Work plan for what procedures/laws need to be drafted
- Laws and policies developed by and for the community incorporating traditional Indigenous knowledge with best practices
- Structured Identification of what is existing
- A more accountable system to getting projects started, and finished.
- Development and implementation of laws and policies.
- Really well, but have political interference
- A long term plan for future development or sustainability
- Enacting laws Developing policies Delegation of authority for decisions
- All departments and council utilize in making decisions
- It could include a reporting

(2.2) 1. What could LUP Implementation look like for your First Nation?

(5/5)

0 4 1

and monitoring requirement, to bring the info back to members at the annual general meeting.

- A phased approach

0 2 5

(2.2) 2. What are some ways that you have linked the LUP to lands management and law making?

(1/4)

- Missanabie doesn't have an LUP yet but it would be good to understand what laws and policies should be considered and how these link to the Land Code
- Will these responses be available for us after the conference?
- survived for location of sport court stewards and guardians present at community charets family trees for families on and off reserves
- Remind our people why we need laws and that we always had them
- Neighbourhood plans, residential lots being developed. Then having members apply for a residential allocation through our Allocation Law. This gives members the option to mortgage their own home on reserve (building, RTM). Then of course it has to follow the building regulation law.
- Some difficulty with "master" planning - consultants using the land use plan to propose more detailed designs / plans
- Currently linking it with

(2.2) 2. What are some ways that you have linked the LUP to lands management and law making?

(2/4)

- the land code development.
- It would be great to link the Land Code requirements within the LUP, for instance if certain development required membership approval, to include that in the LUP.
- Gives meaningful direction to implementing an connecting the laws with the land code and other documents such as the Constitution, Citizenship and CCP.
- Implementing through related laws and policies
- Environmental protection laws and LUP
- Creating procedures that allow law making to unfold.
- Environmental protection and laws required to uphold and enforce
- GIS and mapping and land code
- Environmental and climate change overview.
- Draft LUP lists and describes the laws and policies that will be developed.
- Environmental development. Leases and permits. Housing development. Cultural

0 2 5

(2.2) 2. What are some ways that you have linked the LUP to lands management and law making?

(3/4)

- monitoring and reserve access for outside business.
- That's tough when there is very little ability to enforce laws Ensuring leadership and business arm are aware and follow the LUP Made it part of our comprehensive nation plan Network with departments
- The LUP guided the priority of which laws to work on first
- They would cross reference each other on the laws, lup and land code
- Using the LUP zoning
- map as a baseline for developing the land use and zoning law
- We created SSD law.
- LUP provides direction for lands management & law making
- CCP for community feedback, implemented the community concerns into our LUP.
- Focusing on law making for commercial development areas in the LUP
- Linking to Land Code law development
- Nothing yet, interference and in draft form

0 2 5

(2.2) 2. What are some ways that you have linked the LUP to lands management and law making?

(4/4)

- Adding the LuP as a schedule to many laws

0 1 9

(2.2) 3. How have you navigated these situations?

(1/3)

- Do we have access to all responses from questions on slido?
- I would let them know not to micro manage. To follow their policies and be there for the community
- Ensuring clarity & buy-in from leadership, developing terms of reference for committees, & utilizing BCR's to provide guidance to processes & policies when needed
- Having a council involved as ex officio on the lands committee
- Relationship and team building. Communication between all departments
- A lot of the creation of the LUP is done through community consultation, Leadership support and navigated through Director , Manager, Officer meetings. Clear concise communication is key to this process.
- Important that the whole process starts with leadership Community education so folks are aware that there is a plan that governs land use Tools developed so people know what

(2.2) 3. How have you navigated these situations?

(2/3)

they are supposed to do Keep it simple people are busy and sometimes are doing multiple jobs Assign key staff - so people know who to go to

- Our FN won't post to web a draft LUP so frequent mtgs plus regular newsletter updates are utilized
- involving all community members elders youth and families from the beginning of the process
- Inter office meetings with all departments. Open discussion.
- Councillor with that portfolio. Keep them

updated and excited about the project. Inform them when an important decision needs to be made

- Remind everyone the LUP was designed by the community
- I provided a communication plan to community for approval , once this was approved my process was passed in a motion at a board meeting Now my board minutes are sent to council with a memo - council motions my minutes into their minutes acknowledging they approve my motions and request for bcrs

0 1 9

(2.2) 3. How have you navigated these situations?

(3/3)

- By having at least one leader within the LUP process.
- Communication between departments and council is so important when doing updates to keep this info on the forefront.
- A work in progress. LOADING....
- I haven't found a solution but open to hearing how others have overcome this challenge
- Make a decision now, get knuckles rapped later.
- Lots of relationship building between are departments to re-enforce the LUP
- Still trying

(2.2b -1) Land Use Plan (1/3)

053

Does your First Nation have a Land Use Plan?

Yes

No

(2.2b -2) First Nation Land Laws, LUP-Inspired Projects (1/3)

0 4 1

Does your First Nation have a Zoning Law?

Yes

No

(2.2b -2) First Nation Land Laws, LUP-Inspired Projects (2/3)

0 4 6

Does your First Nation have a Sub-division, Development and Servicing Law?

Yes

No

020

(2.2b -2) First Nation Land Laws, LUP-Inspired Projects (3/3)

Are there specific projects or policies that have been initiated as a result of the land use planning process?

(1/2)

- Allocation Law (residential and recreational lots)
- Cleaning up members home boundaries
- Protection of cultural areas and medicines
- Yes, identified site for community rental Co.plex from LUP
- unknown
- Issued our first development permit for an affordable housing project (which was identified in the LUP)
- No dig without a monitor policy to protect archaeological resources
Staff trained in monitoring
No development happens without coming thru the Lands and resources policy
- Not yet. Our LUP is still in draft.
- There has been plans and projects being worked on currently without LUP use

020

(2.2b -2) First Nation Land Laws, LUP-Inspired Projects (3/3)

Are there specific projects or policies that have been initiated as a result of the land use planning process?

(2/2)

- Land use planning results in lots of questions and how to... 🤔
- work in process redoing surveys plot plans exceptions etc
- Currently building our full slate of laws , starting with a lot allotment law . First law passed was our “dangerous wildlife law”
- The EMP-environmental management plan, community consultation
- Yes until LUP finalized -
- develop neighborhood plans & policies
- Yes
- n/a
- No, we created a LUP back in 2014 but it was never implemented. Hoping to change that this time around.
- SDS Law is 95% complete
- Making the zoning and development laws
- Idk

(2.2b -3) Land Development Processes (1/3)

0 3 4

Does your First Nation have a Land Development Process manual or guidance documents?

Yes

No

Don't know

(2.2b -3) Land Development Processes (2/3)

037

Does your First Nation have their Lands Development Processes written down or turned into a checklist?

Yes

No

Somewhat

(2.2b -3) Land Development Processes (3/3)

036

Does your First Nation have Development Application Forms, Development Application Checklists?

Yes

No

(2.2b -4) Lands Office (1/3)

0 4 8

Does your Lands department have anyone with GIS expertise?

Yes

No

(2.2b -4) Lands Office (3/3)

0 4 9

Would you feel comfortable leading or facilitating community engagement sessions?

Yes

No

(2.2b -5) ATR Lands, Regional Planning (1/3)

050

Does your First Nation have potential ATR lands that are currently ongoing?

Yes

No

(2.2b -5) ATR Lands, Regional Planning (2/3)

050

Does your First Nation have a Services Agreement with an adjacent municipality or regional government?

Yes

No

(2.2b -5) ATR Lands, Regional Planning (3/3)

050

Does your First Nation have issues relating to Cemetery sites on reserve lands (e.g. no room to expand or degradation of current lands)?

Yes

No

(2.2b -6) Implementation: What does the implementation of a Land Use Plan look like for your First Nation and what ways can the RC support this work?

- Not there yet. But working on it. Core funding is required to retain staff to do the work not just funding for consultants.
- Implementation might take a bit of time for members and staff to be on board due to the lack of interest in change.
- Cohesive development in the community. Great relationship building and communication between departments Community involvement
- Helping with making timelines that are achievable with knowledge of experience with other Nations.
- sample docs - no need to remake the wheel.
- How to re jump start the process and getting council to listen
